Today Are the
Resources of
Tomorrow at the
Resource Prices
of **Yesterday** ”

“Demystifying the
Circular Economy”

“10 Days to Circular”

We at the Circular Economy Company (CEC) provide a very unique service in the Irish market.

Our service allows a company to accurately and easily manage their sustainability programme. Our software is a one stop solution for waste monitoring and reporting.

Please feel free to contact us and we will be happy to outline our service in more detail.

Three months waste reports are all it takes.
The rest is up to us.

With your waste reports we will plan a clear pathway to the circular economy in 10 days. This knowledge is cost neutral to you.

This is your opportunity to explore your circular economy options. Your reports currently sit in a file “Just sitting there” of no value ?

We take those reports, which identify your current waste position, and we predict your pathway to the circular economy.

Waste Hierarchy

Software Benefits

- Centralised waste management via a single tool
- A cloud-based software converts your waste from being a problem into an asset
- Our solution is cost neutral
- The software will support and guide the implementation of your company sustainability objectives and regularity requirements
- Carbon footprint analysis (Carbon Trust Approved)
- Landfill will no longer be your only solution
